Professional Summary

Identity and Endpoint Security Engineer experienced in Microsoft 365 administration, Entra ID, IAM, Conditional Access, Intune endpoint management, BitLocker encryption, incident response, and infrastructure hardening in a HIPAA-regulated environment. Skilled in modernizing systems, enforcing security controls, securing remote access, and strengthening compliance through risk assessment, documentation, and user training.

Key Impact & Security Work

- Engineered Windows Hello for Business (WHfB) with Cloud Kerberos Trust for international travel devices governed by location based Conditional Access, validated successful provisioning, and isolated device specific exceptions during rollout.
- Standardized and enforced BitLocker usage across Intune managed endpoints, enhancing data at rest security and reducing the risk associated with lost or stolen devices.
- Investigated and escalated a Mimecast phishing incident in which collaboration yielded improvements to Mimecast's own detection logic.

Professional Experience

Systems Administrator

May 2025 to Present

Claims & Risk Management Services, LLC

- Implemented hybrid identity using Microsoft Entra Connect, synchronizing on-prem Active Directory with Entra ID and resolving issues such as duplicate proxy addresses and immutable ID alignment.
- Investigated Microsoft 365 audit logs using PowerShell's Search-UnifiedAuditLog to trace administrative actions and produce audit-ready evidence for identity and license changes.
- Created and executed phishing simulations using Microsoft Defender for Office 365 to assess user awareness and improve security posture.
- Enforced Microsoft 365 Intune device compliance and Entra ID (Azure AD) Conditional Access policies across the organization, supporting secure user lifecycle management and operational continuity.
- Implemented and validated a modernized remote access design using WatchGuard IKEv2 and Intune-based Always On VPN planning, improving usability and reliability for managed endpoints.
- Designed and delivered CRMS's annual HIPAA security awareness training, including phishing, credential hygiene, and data handling practices.

IT Support Lead (Sole IT Owner / Systems & Security Administration)

Nov 2023 to Mar 2025

Yes You Can! / Yes You Can! Medical

- Executed a large scale data migration of 70 TB from on premises systems to Microsoft OneDrive for Business and SharePoint using Powershell, preserving data integrity and business continuity while maintaining a cost effective approach.
- Recovered a compromised executive YouTube channel after takeover by coordinating with YouTube Support, revoking compromised editor access, auditing shared permissions, and implementing an additional identity verification control for account access.
- Automated high risk file/folder renaming and normalization using PowerShell to meet destination platform naming requirements, reducing manual effort and migration error risk.
- Performed API key rotation and token access control during a Shopify Payments migration, maintaining secure continuity of payment operations in a PCI DSS cardholder data environment.

IT Support Analyst

Mar 2023 to Nov 2023

Yes You Can!

- Administered Barracuda firewall and office network infrastructure, including access control policies, VPN access support, and wireless access point troubleshooting.
- Supported user provisioning, permission management, and access changes across Microsoft 365 Entra ID (Azure AD), AWS, Shopify, and Slack while maintaining operational continuity.
- Managed access to production systems while supporting least privilege and preventing scope creep.
- Coordinated with vendors for decommissioning and disposition of legacy servers.

Technical Support Engineer

Feb 2022 to Mar 2022

Kaseya

- Supported the IDAgent security suite and documented resolutions on Atlassian's JIRA.
- Communicated phishing identifiers, security product value and usage practices to MSP customers.
- Collaborated with product managers to reduce backlog for security related tooling features.

Help Desk Technician

Jan 2022 to Feb 2022

IT Works Network

- Received and triaged technical requests via RingCentral and Autotask PSA.
- Troubleshoot remote devices using Datto RMM.
- Documented resolutions in ITGlue for repeatability and knowledge transfer.

Earned Certifications and Degrees

- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- AWS Certified Cloud Practitioner
- Microsoft MD 100 (Windows Client)
- B.S. Mathematics, Florida State University, Class of 2015
