## Professional Summary

Identity and Endpoint Security Engineer experienced in Microsoft 365 Administration, including Entra ID/IAM, Conditional Access, Intune endpoint management with BitLocker encryption, incident response, and infrastructure hardening. Technical owner responsible for production IT in a HIPAA regulated healthcare claims environment. Adept at modernizing systems, enforcing security controls, and improving remote access security. Skilled in strengthening compliance through risk assessment, documentation, and user training.

## Key Impact & Security Work

- Implemented Windows Hello for Business (WHfB) policy and onboarding, enabling biometric/PIN sign in on supported endpoints with controlled password fallback.
- Standardized and enforced BitLocker usage across Intune managed endpoints, enhancing data at rest security and reducing the risk associated with lost or stolen devices.
- Investigated and escalated a Mimecast phishing incident in which collaboration yielded improvements to Mimecast's own detection logic.

## Professional Experience

### **Systems Administrator**

May 2025 to Present

#### Claims & Risk Management Services, LLC

- Served as the technical owner for production infrastructure and security operations in a HIPAA regulated healthcare claims TPA (business associate), managing day to day IT operations, access control, endpoint security, and incident response.
- Modernized remote access (VPN) infrastructure, reducing attack exposure and support friction while enhancing reliability and user experience.
- Designed and delivered CRMS's annual HIPAA security awareness training, including phishing, credential hygiene, and data handling practices.
- Performed a security risk assessment, including identifying security gaps, determining remediation priorities, and collecting evidence for audit purposes.

### **IT Support Lead (Sole IT Owner / Systems & Security Administration)**

Nov 2023 to Mar 2025

#### Yes You Can! / Yes You Can! Medical

- Configured Microsoft 365, Entra ID, Intune, and Conditional Access policies across the organization, supporting secure user lifecycle management and operational continuity.
- Recovered a compromised executive YouTube channel after takeover by coordinating with YouTube Support, revoking compromised editor access, auditing shared permissions, and implementing an additional identity verification control for account access.

- Performed API key rotation and token access control during a Shopify Payments migration, maintaining secure continuity of payment operations in a PCI DSS cardholder data environment.
- Administered Barracuda firewall and office network infrastructure, including access control policies, VPN access support, and wireless access point troubleshooting.
- Managed access to production systems while supporting least privilege and preventing scope creep.

### ***IT Support Analyst***

Mar 2023 to Nov 2023

#### **Yes You Can!**

- Executed a large scale data migration of 70 TB from on premises systems to Microsoft OneDrive/SharePoint, preserving data integrity and business continuity while maintaining a cost effective approach.
- Automated high risk file/folder renaming and normalization using PowerShell to meet destination platform naming requirements, reducing manual effort and migration error risk.
- Managed identity and access across Microsoft 365, Entra ID (Azure AD), AWS, Shopify, Slack, and other third party platforms.
- Supported user provisioning, permission management, and access changes across departments while maintaining operational continuity.
- Contributed to system standardization and modernization during cloud adoption, including vendor coordination for decommissioning and disposition of legacy servers.

### ***Technical Support Engineer***

Feb 2022 to Mar 2022

#### **Kaseya**

- Supported the IDAgent security suite and documented resolutions on Atlassian's JIRA.
- Communicated phishing identifiers, security product value and usage practices to MSP customers.
- Collaborated with product managers to reduce backlog for security related tooling features.

### ***Help Desk Technician***

Jan 2022 to Feb 2022

#### **IT Works Network**

- Received and triaged technical requests via RingCentral and Autotask PSA.
- Troubleshoot remote devices using Datto RMM.
- Documented resolutions in ITGlue for repeatability and knowledge transfer.

## **Earned Certifications and Degrees**

- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- AWS Certified Cloud Practitioner
- Microsoft MD 100 (Windows Client)
- B.S. Mathematics, Florida State University, Class of 2015
